Education

The University of Texas at Arlington

Bachelor of Science in Computer Science

Arlington, TX

Expected Dec 2026

- **GPA:** 3.72 **Major GPA:** 3.86
- **President's List:** Fall 2025, Spring 2026 — awarded for achieving a 4.0 semester GPA

Relevant Coursework

- Data Structures
- Algorithms
- Database Systems
- Operating Systems
- Computer Networks
- Software Engineering
- Object-Oriented Programming
- Artificial Intelligence
- Machine Learning
- Theory of Computation

Projects

DevOpsPulse — Full-Stack Uptime Monitoring Platform | *React, TypeScript, Express, Prisma, PostgreSQL, JWT*

[Live](#) | [GitHub](#)

- Built and deployed a full-stack uptime monitoring platform using React, TypeScript, Express, Prisma, PostgreSQL, and JWT authentication with httpOnly cookies.
- Designed a monitor, check, and incident data model with Prisma and PostgreSQL, including indexed time-range queries for uptime percentages, latency charts, incident history, and public status pages.
- Implemented an incident detection state machine that opens incidents after consecutive failures, resolves them on recovery, tracks downtime duration, and creates DOWN and RECOVERY alerts.
- Integrated GitHub Actions as an external scheduler to trigger secured uptime checks every 5 minutes, avoiding unreliable in-process cron jobs.
- Deployed production services across Vercel, Render, and Neon with environment-based configuration, CORS, protected API routes, and real monitor checks for Google, GitHub, Vercel, and Wikipedia.

ResumeRoast — AI Resume Analyzer SaaS | *React, Node.js, Express, MongoDB, Claude API, Stripe*

[Live](#) | [GitHub](#)

- Built an AI-powered resume analysis SaaS that accepts PDF uploads, extracts resume content, and generates ATS-style scoring with actionable feedback.
- Integrated Claude API to provide resume improvement suggestions, rewrite recommendations, and job-search focused feedback.
- Implemented authentication, usage limits, server-side validation, MongoDB persistence, and production-ready error handling.
- Added Stripe Checkout, Billing Portal, and webhook handling to support subscription-based paid AI resume rewrites.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML/CSS

Frontend: React, Bootstrap, Responsive Web Design

Backend: Node.js, Express.js, REST APIs, JWT Authentication, httpOnly Cookies

Databases: PostgreSQL, MongoDB, Prisma ORM, MySQL

Cloud & DevOps: Git, GitHub, GitHub Actions, Vercel, Render, Neon, AWS

Tools & APIs: Postman, VS Code, Stripe API, Claude API, PDF Parsing

Certifications & Achievements

HackerRank Software Engineer Certification

Credential

2026

HackerRank

President's List

Awarded for earning a 4.0 semester GPA

Fall 2025, Spring 2026
