Education

The University of Texas at Arlington

Bachelor of Science in Computer Science

Arlington, TX

Expected Dec 2026

• **GPA:** 3.72 **Major GPA:** 3.86

• **President's List:** Fall 2025, Spring 2026

Relevant Coursework

Data Structures, Algorithms, Database Systems, Operating Systems, Computer Networks, Software Engineering, Object-Oriented Programming, Artificial Intelligence

Projects

DevOpsPulse: Full-Stack Uptime Monitoring Platform

[Live Demo](#) — [GitHub](#)

React, TypeScript, Express, Prisma, PostgreSQL, JWT

- Engineered a state-machine-driven incident detection system (DOWN → DEGRADED → UP) that automatically opens, escalates, and resolves incidents based on consecutive check failures, tracking downtime duration end-to-end.
- Designed a relational schema with Prisma and PostgreSQL supporting indexed time-range queries across monitors, checks, and incidents to power uptime percentages and latency charts.
- Implemented secure authentication using JWT with httpOnly cookies, CORS-protected API routes, and environment-based configuration to safeguard sensitive monitoring data.

ResumeRoast: Full-Stack AI Resume Analyzer SaaS

[Live Demo](#) — [GitHub](#)

React, Node.js, Express, MongoDB, Claude API, Stripe

- Built a full-stack SaaS that parses uploaded PDF resumes and uses the Claude API to generate ATS-style scoring, rewrite suggestions, and job-focused feedback tailored to software engineering roles.
- Designed a freemium subscription model with Stripe Checkout, Billing Portal, and webhook handling, enforcing usage limits server-side to gate premium AI-powered rewrites.
- Validated end-to-end reliability across 20 test resumes spanning varied formats and layouts, achieving a 100% successful processing rate.

LedgerOne: Enterprise Investment Portfolio & Order Management Platform

[Live Demo](#) — [GitHub](#)

Java, Spring Boot, Spring Security, PostgreSQL, Flyway, React, TypeScript, Docker

- Built a production-style investment platform with JWT/refresh-token authentication, RBAC admin workflows, portfolio dashboards, and market/limit order lifecycle management.
- Modeled 13 JPA entities and 14 PostgreSQL tables with Flyway migrations spanning users, roles, portfolios, holdings, orders, audit logs, risk alerts, price history, and ledger transactions.
- Implemented trading rules for buying power, share availability, and duplicate-safe order requests; wrote 7 passing JUnit 5/Mockito tests and deployed on Render and Vercel.

Technical Skills

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML/CSS

Frontend: React, Bootstrap, Responsive Web Design

Backend: Java, Spring Boot, Spring Security, Spring Data JPA, Node.js, Express.js, REST APIs

Security: JWT Authentication, httpOnly Cookies, CORS, Server-Side Validation

Databases: PostgreSQL, MongoDB, MySQL, Prisma ORM, Flyway

Testing: JUnit 5, Mockito, Maven, Postman

Tools & APIs: Stripe API, Claude API, PDF Parsing

Cloud & DevOps: Git, GitHub Actions, Docker, Vercel, Render, Neon, AWS

Certifications & Achievements

HackerRank Software Engineer Certification

2026

Credential

HackerRank

President's List

Fall 2025, Spring 2026

Awarded for earning a 4.0 semester GPA

The University of Texas at Arlington
